Experience

Nov 2019 - Present **FREELANCE DEVELOPER - Trustful Robot**

Developing fully-custom WordPress sites with a focus on elegant author experience

Developing static sites with GatsbyJS and Prismic CMS

2012 - Nov 2019 **SENIOR DEVELOPER - Bullhorn Creative**

Developed mobile-first, responsive WordPress and Shopify themes based on mockups from designers

Worked closely with designers to refine my work to match their designs and intended user experiences with a high attention paid to detail

Engineered intuitive and flexible content builder systems with Advanced Custom Fields and custom post types to separate content input from design and reduce client stress

Designed and implemented agency's preferred tech stack based on npm, gulp, git, and Sass

Optimized themes for performance, accessibility, and best practices using Chrome Lighthouse audits

Developed interactive SVG animations with GreenSock Animation Platform

Wrote documentation and trained users on how to manage their content as well as advised on best practices

GSuite and Adobe Creative Cloud Administration for Team

Mixed and mastered audio for commercials and web videos

2010 - 2012 **FREELANCE WEB DESIGNER & DEVELOPER - University of Kentucky / WRFL**

Designed and developed Django-based website to allow for user management of volunteer DJs and playlisting of songs at college radio station

Developed websites for annual music festival (Boomslang)

Experience (continued)

2001 - 2012

COMPUTER ANALYST / WEBMASTER - Lexington-Fayette Urban County Government

Administered all aspects (IIS web server, Microsoft SQL Server, as well as content editing and client relations) of website for the city of Lexington, KY

Designed logo, graphics, and layout for city atlases

Designed and developed ASP applications for internal and external audiences

Taught regular courses to city employees covering usage of the website's content management system
